

Whittler Grows His Own Wood

Fifty years ago, Ed Choby planted a Pennsylvania white pine seedling in his back yard. Today the tree is 20 inches in diameter and has branches that are up to four inches thick. The lower branches are cut into suitable lengths for whittling.

Fresh off the tree, the blocks should be washed in soapy water, Ed says, to remove scale. The blocks may be carved immediately or be allowed to dry. In either event no checking takes place.

The wood has a smooth firm grain and is nice finished natural. The accompanying photos show some of a variety of ideas that may be carved.

Ed Choby, one of the early members of NWCA, is now retired after a lifetime of supplying carvings and carving blocks. He has traveled extensively to promote the art of whittling, teaching primarily at summer camps. He has used many of the ideas and patterns that have been published in *Chip Chats* over the years.

Anyone wishing to correspond with him is directed to write to: Ed Choby, 1544 Berkshire Ave., Pittsburgh, PA 15226.

Ed Choby with his pine tree.

Samples of the variety of carving Ed Choby has made from sawed off limbs from the pine tree he planted half a century ago.

CHIP CHATS

FOUNDED IN 1953

Chip Chats is published bimonthly by National Wood Carvers Association, 7124 Miami Avenue, Cincinnati, Ohio 45243. Annual membership dues are \$5 and include a subscription to the magazine. NWCA is a non-profit organization dedicated to the interests of amateur and professional carvers and whittlers.

Postmaster: If undeliverable, please send notice by Form 3579 to 7124 Miami Avenue, Cincinnati, Ohio 45243. Second class postage paid at Cincinnati Ohio.
