

# When the Snow is on The Roses

**C**                      **F**                      **C**  
Now the Golden sun can see us kiss

**F**                      **C**  
Every summer day we'll love like this

**F**  
When the snow is on the roses

**G7**                      **C**  
When the bluebirds flown away

**F**  
In my arms we'll both remember

**G7**                      **C**  
All the love we share today

**F**                      **C**  
As we walk along the silvery shore

**F**                      **C**  
Vows we make will last forevermore

**F**  
When the snow is on the roses

**G7**                      **C**  
When the summer stars are gone

**F**  
One more summer will be over

**G7**                      **C**  
But our love will still go on

**F**  
When the snow is on the roses

**G7**                      **C**  
When the bluebirds flown away

**F**  
In my arms we'll both remember

**G7**                      **C**  
All the love we share today
