Create Your Own Custom Spanish Scripts to Suit Your Lifestyle & Habits.

Introduction / Introducción

The first conversations in Spanish are always the scariest. You know what you want to say, but you just can't find the right words. It happens to a lot of people. However, having some basic scripts in place can help you avoid drawing a blank! So, the purpose of this PDF is to help you build your own **customized scripts** that you can use to start a conversation. Here is how it works.

In the following pages, you'll find empty tables where you can write down the most useful phrases for you. To make it easy to find them, you can classify these tables by category. If you're struggling to find phrases, you can use the following resources from your Spanish learning kit:

- 150+ Conversational Spanish Questions & Responses
- Top 27 Verbs to Build Phrases
- 18 Spanish Vocabulary Lists
- 375+ MUST-KNOW Adjectives, Adverbs, Pronouns, Prepositions & Articles
- Top 200+ Spanish Verbs

Check these resources and, based on your interactions, select phrases that you think may be useful for those situations. I've included an example of phrases that I would use when meeting new people. You can use it as a guideline.

Note: You may be wondering why I'm not giving a finished script that you can follow. This exercise is great for you to put into practice something that I mentioned on the Spanish hacks –learning vocabulary that you'll actually use. To put it simply, a person learning Spanish to travel doesn't need the same vocabulary that a person that is planning to go move to a Spanish speaking country. So, think about what that goal of yours is and customize your scripts accordingly.
